Create Braille Labels is 3 steps!

Braille labels can be created quickly, Input, Translation and stamping. Our uniquely developed mechanism enables marking at the fastest speed.

Create one more sheets if needed

Entry and editing can be done wirelessly using your computer or smartphone, making it stress-free. Use cable for power supply.

Leave everything from editing to Braille

With the automatic braille translation function of the software, you can create braille labels even without knowledge of braille.

with free 2 pcs special Braille Tape

A design that blends into everyday life!

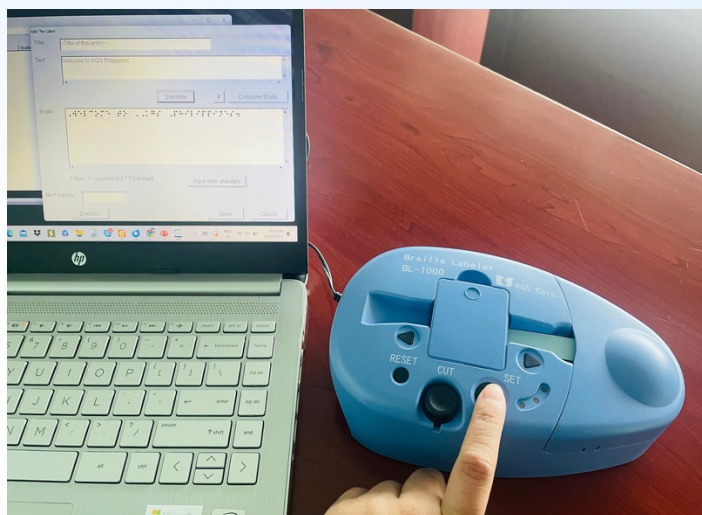

It can be placed in a small space of A5 paper size and can be used anywhere.

Printable from 3 types of devices

It can be operated from editing to printing in PC, Braille Display, Smartphone (Android).

Simple key layout that anyone can use.

It supports various screen reading software so that it can be used by visually impaired people. Also supports 6-point braille input.
